

ABSTRACT

A green sheet coating material includes ceramic
5 powder and a binder resin containing a butyral based
resin as the main component, which furthermore includes a
xylene based resin as a tackifier. The xylene based resin
is included in a range of 1.0 wt% or less, more
preferably 0.1 or more and 1.0 wt% or less, and
10 particularly preferably more than 0.1 and 1.0 wt% or less
with respect to 100 parts by weight of ceramic powder.
